

Aaron Oluwaseun Aluko

Lagos, Nigeria | Blockchain Researcher, AI Engineer & Fullstack Web Developer

X: @i_am_richaaron | GitHub: richaaron | Telegram: @richaaron | Discord: just_me_flashy

A blockchain researcher, AI engineer, and fullstack web developer passionate about the frontier where cryptographic systems meet intelligent agents. Designing, researching, and shipping products that push what's possible in Web3 infrastructure and AI-driven automation. Experienced Web3 Community Lead driving growth through data-driven metric analysis, onboarding strategies, and community engagement. Safari Certified and part of the first cohort.

EXPERIENCE

Freelance Fullstack Developer

Jan 2024 — Present

Software Engineering

Architecting and building responsive, high-performance web applications using modern JavaScript frameworks. Developing robust backend APIs and integrating with cloud services to deliver seamless user experiences.

Euclid Protocol

Sep 2024 — Present

Ambassador

Advocating for Euclid, a decentralized cross-chain infrastructure solving liquidity fragmentation. Educating the community on unified liquidity, the Virtual Settlement Layer, and seamless cross-chain swaps without bridges.

Mantra Chain

Apr 2024 — Jan 2026

Community Moderator

Moderated the official community for MANTRA, a security-first Layer 1 blockchain built on the Cosmos SDK tailored for Real-World Asset (RWA) tokenization. Facilitated discussions around compliance, \$OM tokenomics, and the bridging of TradFi and DeFi.

Avail Project

Mar 2024 — Aug 2025

Community Moderator

Guided community interactions for Avail, a modular blockchain infrastructure designed to solve Web3 fragmentation. Supported developers and users in understanding Data Availability (DA), rollups, and cross-chain interoperability.

SELECTED WORK

Safary — DAO Governance Platform

2024

A governance platform for decentralized communities. Proposal management, on-chain voting, treasury dashboards, and delegate reputation.

Stack: Solidity, Next.js, The Graph, IPFS

Neural Chain — On-chain Analytics Agent

2024

LLM-powered agent that reads smart-contract activity, surfaces wallet behavior, and briefs DAO participants in plain English.

Stack: Python, LangChain, GPT-4, Ethers.js

Onboard — Community Growth Suite

2023

End-to-end onboarding toolkit for Web3 communities: education tracks, contribution scoring, and engagement gamification across Discord and Farcaster.

Stack: Next.js, Supabase, Discord API, Ceramic

PolyID — Decentralized Identity

2023

Self-sovereign identity with verifiable credentials for African Web3 communities, anchored on Polygon and portable across dapps.

Stack: Solidity, Polygon, React Native, Ceramic

CERTIFICATIONS

- **Safary Certified — Cohort 1 (2024):** Mastered Web3 growth, data-driven metric analysis, and community engagement strategies as part of the inaugural cohort.
- **AI Agents & Prompt Engineering (2023):** Specialized in designing LLM-powered agents, integrating AI pipelines, and advanced prompt engineering for automated systems.
- **Advanced Solidity Developer (2022):** Certified in smart contract architecture, security best practices, and building robust decentralized applications on EVM networks.
- **DeFi Protocol Engineering (2022):** Deep dive into decentralized finance mechanisms, liquidity pools, yield farming, and tokenomics design.

SKILLS & EXPERTISE

Fullstack Web: React, Next.js, Node.js, Express, TypeScript, PostgreSQL, MongoDB, REST & GraphQL APIs, TailwindCSS

Blockchain: Solidity, Web3.js, Ethers.js, DeFi Protocols, Smart Contracts, NFT Architecture

AI & Research: Machine Learning, LLM Integration, AI Agents, Data Pipelines, Model Fine-tuning, Prompt Engineering

Web3 & Community: Community Lead, Growth Strategy, Metric Analysis, Safary Certified, Web3 Onboarding, DAO Governance, Cohort 1 Alumni
